Compact Semi-Automatic Weigh-Wrap-Price Labeller

Model: AW5600CPSA2

PACKAGING EQUIPMENT

www.wedderburn.com.au

AW5600CPSA2 Compact Semi-Automatic Weigh Wrap Price Labellers save precious floor space whilst meeting the high demands of efficient food weighing and packing operations.

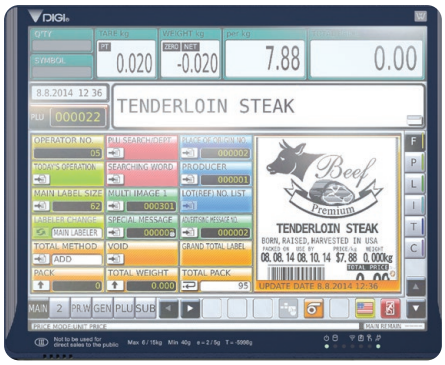

The AW5600CPSA2 delivers fast accurate semi-automatic weigh labelling, and the newly enhanced sealing system means the wrapping finish is even better than in previous models, resulting in superior on-shelf food presentation & hygiene.

NMI approved for trade use in Australia, and with an impressive weigh-wrap-labelling speed of up to 30 packs per minute, this compact wrapper is certain to enhance operations where accurate weighing, packing and pricing is required.

15” Large Full Colour Touch Screen

The user-friendly operator screen improves efficiency and flexible formatting means size, colour and location can be changed to suit your operation.

- Preset and frequently used function keys can be assigned for quick access.
- Label content can be previewed on the display prior to printing to prevent labelling errors.
- Extremely large memory easily supports an ever-increasing need for print items.
- The screen angle is adjustable to ensure good viewing for all operators and lighting conditions.

Enhanced Sealing System for Attractive Hygienic Food Packaging

The AW5600CPSA2 features an enhanced sealing system and newly designed labelling arm for automatic label placement.

Together these features deliver a truely superior packaging finish with tight clean wrap and accurately positioned labels, all of which create greater consumer appeal and confidence in the quality of your product.

Linerless Labelling with Built-In Auto-Cutter

DIGI’s linerless labelling technology with a unique built-in label cutter eliminates liner waste, increases flexibility and profit.

- **Eliminate wasted white space on big labels.** The auto-label-sizing feature eliminates unused space on the label and automatically adjusts the label size. This reduces the label cost and makes labels more attractive.
- **Increased flexibility in label formatting.** The auto-cut feature cuts from a continuous strip of linerless labels every time a label is printed. Variable label layouts and sizes can be printed from a single cut. This reduces the number of label types you need to store and time spent on changing label rolls for different product.
- **No more label liner waste.** The elimination of backing paper for labels (label liner) means no liner waste to store or dispose of which frees up valuable floor space and contributes positively to environmental goals.

Compact Semi-Automatic Weigh-Wrap-Price Labeller

Model : AW5600CPSA2

Smart Labelling

80 mm wide 300 dpi thermal head

The 300 dpi thermal head enables clear and crisp label printing for enhanced consumer appeal and quality bar code printing for accurate scanning at checkout. DIGI's signature 80 mm print width allows more information to be included on labels so that labelling regulations are met while still keeping attractive advertising messages.

Easy label change

The AW5600CPSA2 has a very simple spooling structure for the label roll. This allows for quick, easy exchange of label rolls in the front-loading labeller.

High productivity

Weighing, wrapping, and price labelling is automatically done in one pass at an impressive speed of up to 30 packs per minute. In addition to enhanced shelf appeal and hygiene, the superior quality of wrapping and labelling results in less goods needing to be repacked or returned due to leakage.

FEATURES OVERVIEW

- NMI approved for trade use
- small footprint that saves valuable floor space
- easy to use with large 15" full colour touch screen and on-screen help messages
- capable of wrapping trays up to 130 mm high
- wrapping speed up to 30 packs per minute
- wide 300 dpi thermal head allows more detail to be printed on labels up to 80 mm wide
- film loading is fast and easy
- engineered to use environmentally conscious linerless labels
- free-layout function keys allow users to customise the key layout
- fast PLU file communication via Ethernet
- contact parts such as the weighing platter can be easily accessed and removed for thorough cleaning so that excellent hygiene standards can be maintained
- optional wireless RF communication for a cable-free environment
- optional second and third labeller heads
