Semi-Auto Bench Top Tray Sealer - Gas Purging

Model : WFT85BCG11

The perfect solution for ready meals, fresh meat and other packaged food items. This semi-automatic tray sealer is designed to seal a wide variety of food trays and can extend a product's shelf life through Modified Atmosphere Packaging (MAP), which purges the package with gas and reduces residual oxygen to very low levels. Equipped with motor driven gear box for smoother tool lifting and film cutting motion, this also eliminates the need for an external compressed air system.

By choosing a Wedderburn tray sealer, you are assured the highest quality machine backed by our nationwide network of service.

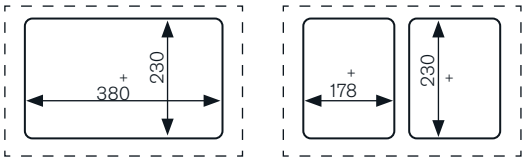

FEATURES

- semi-automatic sealing and cutting operation
- easy to use slide in drawer with handle and protection plate for added operator safety
- 304 stainless steel construction
- touch screen, programmable control system
- option of inter-changing sealing plate/tool to customize
