

Handheld Label Applicator

Model : AP Series

Easy to use hand-held label applicator for accurate label placement. The built-in sensor uses precision technology to provide support for non-standard shaped labels

FEATURES

AP Series

- mech-sensor automatically detects leading edge of label
- provides accuracy in dispensing and adjusts label strokes automatically
- no requirement for punch holes or special slits in liner
- exclusive label edge detector, mechanically senses label length
- easy and efficient side loading
- can be used with labels of varied and unique shapes including round, oval and other non-rectangular shape labels

VARIATIONS

Model Number	Label Width (mm)	Label Roll - Max Outside Diameter (mm)	Label Stroke
TW APN - 60	25-60	100	20-60
TW APF - 100	25-100	100	20-60
TW APF - 60*	25-60	100	20-60

*Model TWAPF-60 and TWAPF-100 has moveable "mech-sensor" to dispense die-cut label of non-rectangular shapes.
