Continuous Band Sealer

Model : WFCBSH14

Our stainless steel horizontal continuous band sealing machines speed up production and make light work out of sealing plastic bags and film. These reliable machines are engineered for many industries including; food, medical, cosmetics and componentry.

FEATURES

- suitable for sealing small packages
- durable stainless steel construction
- easy to use as the operator only needs to feed the bags or material into the machine
- temperature controller ensures consistent temperature throughout the operation for quality sealing
- temperature can be adjusted to suit the job at hand
- conveyor belt speed regulation
- sealing direction is left to right
- distance between the between conveyor and sealer can be adjusted to suit the item currently being sealed

OPTIONS

- vertical model available upon request (WFCBSV14)
